Developing Business Leadership during Technology's

Course code: ML83 From: 13-04-2026 Venue: Casablanca - Course Fees: 3600 £

Introduction

This training course will help you improve your understanding of digital leadership and how to apply it to help your organization convert.

As new digital technologies emerge, the demand for digital leaders grows exponentially. Regardless of your background, this training course will allow you to investigate and learn how digital leaders can leverage and exploit new technologies for innovation and growth, as well as provide you with additional insight into the digital landscape.

Information Technology (IT) is fast changing the world around us. This course will also give you an understanding of IT-enabled changes in the business environment, and how insightful administrators leverage Information Technology (IT) to build value and win competitive battles.

This training course will highlight:

- Impressions of technological shift on the industry
- Investigations of competition and business models in the high-tech industry (e.g. Google, Apple, and Facebook)
- Aggressive dynamics of industries that consume significant technology with emphasis on how technology has disrupted some industries
- How IT transforms cost structures of firms by helping them grow information skills that significantly increase value chain effectiveness
- Impacts of IT on variation and decision-making within firms that ultimately impacts revenue growth

Course Objectives of Developing Business Leadership during Technology's

At the end of this training course, you will learn how:

- Identify how a business can increase sales and return on investment with new technology
- Construct a matrix of necessary organizational competencies to effectively use new technologies in business practice
- Enhance the management and strategy of a business through digital technologies such as mobile apps, the Internet of Things, Cloud computing, and data analytics
- Align business and Information Technology (IT) strategies and apply them within the workplace, overcoming the constraints and challenges of using Information Technology (IT)
- Benchmark your organization against other industrial players and identify the key features for superior to

the industry-average performance

Course Methodology of Developing Business Leadership during Technology's

This training course uses a range of digital leadership and business models, methods, and tools along with group work, reflective exercises, situational simulations, individual feedback, and case studies.

Organizational Impact of Developing Business Leadership during Technology's

You will learn new approaches to improving business leadership and addressing disruptive changes to enable you to help build a more effective organization that is able to realize its potential by:

- Developing a greater capacity to achieve digital leadership
- Enhance the management and strategy of a business through digital technologies
- Overcoming the constraints and challenges of using IT in the organization
- Building an efficient strategic alignment through proven digital business models
- Contributing to innovation and decision-making which impacts revenue growth
- Helping it to build information capabilities that significantly increase value chain efficiency

Personal Impact of Developing Business Leadership during Technology's

Participants will develop a whole new appreciation of their capacity for digital leadership through:

- Articulating impacts of technological innovation on the industry
- Guiding their teams in weathering the disruptive innovation in workplaces
- Aligning business and IT strategies within the workplace
- Delivering superior to industry-average performance through business transformation
- Formulating digital strategies to increase sales and return on investment with new technology
- Applying proven digital business models to build an efficient strategic alignment

Target Audience of Developing Business Leadership during Technology's
