CCTV System Upgrades and Expansion

Course code: SC212 From: 27-07-2026 Venue: Geneva - Course Fees: 5250 £

Course Introduction: CCTV System Upgrades and Expansion is a comprehensive training program designed to empower security professionals, CCTV system administrators, and technicians with the knowledge and skills needed to effectively upgrade and expand existing CCTV systems. In a rapidly evolving technological landscape, it is essential to keep CCTV systems up-to-date and adaptable to changing security requirements.

Course Objectives of CCTV System Upgrades and Expansion

By the end of this training course, the participants will be able to:

- Assess the need for upgrades and expansion in CCTV systems.
- Plan and execute upgrades of existing CCTV hardware and software.
- Expand CCTV systems to accommodate growing security demands.
- Optimize system performance and functionality.
- Troubleshoot common issues during upgrades and expansions.

Course Methodology of CCTV System Upgrades and Expansion

The training program combines theoretical sessions, practical exercises, hands-on lab work, and interactive discussions to ensure a comprehensive learning experience. Participants will have the opportunity to apply their knowledge in real-world scenarios and engage in practical exercises to reinforce the concepts learned. The training program emphasizes a practical and hands-on approach to enhance participants' ability to apply the acquired skills in their professional roles.

Who Should Attend

This training course is a suitably wide range of professionals but will significantly benefit:

- Security professionals responsible for CCTV system management.
- CCTV system administrators and operators.
- Technicians involved in CCTV system maintenance and upgrades.
- Anyone seeking to enhance their knowledge of CCTV system improvements.

Course Outline

Day 1: Introduction to CCTV System Upgrades and Expansion

- Overview of the course
- The importance of keeping CCTV systems current
- Assessing the need for upgrades and expansion
- Planning for successful upgrades and expansions

Day 2: Hardware Upgrades

- Evaluating existing CCTV hardware
- Selecting and upgrading cameras and lenses
- Upgrading DVRs and NVRs
- Integrating new technology (e.g., HD, 4K, PTZ)

Day 3: Software Upgrades

- Evaluating existing software and firmware
- Updating and upgrading CCTV software
- Ensuring compatibility with existing systems
- Testing and verifying software upgrades

Day 4: System Expansion

- Assessing capacity and scalability
- Adding new cameras and devices
- Expanding storage solutions
- Network infrastructure considerations

Day 5: Optimization and Troubleshooting

- Optimizing system performance
- Addressing common challenges during upgrades and expansions
- Testing and validation
- Future-proofing your CCTV system
