# Essentials of Quality Assurance

Course code: PQ135 From: 27-09-2026 Venue: Istanbul - Radisson Blu Hotel, Istanbul Sisli Course Fees: 5000 £

## Introduction

To manage quality assurance, many organizations have adopted a structured approach to managing their operations through various different standards and techniques. This interactive Oxford Essentials of Quality Assurance training course will improve delegate skills and knowledge of quality assurance, as well as provide them with best practices for improving quality assurance within their organizations, including the new ISO9001. This training course will provide an overview of the various concepts of managing quality in organizations and will look at how risks and opportunities are frequently successfully managed in organizations through effective quality assurance management.

## Course Objectives of Essentials of Quality Assurance

By the top of this training course, delegates are going to be able to:

- Be conscious of the history of quality assurance and standardization
- Understand a part of effective teamwork in contributing to overall quality assurance in their organization
- State different models and frameworks for quality assurance
- Recognize the importance of the customer within the quality management system
- Understand the newest international frameworks in management systems and discuss a number of the advantages these can bring back organizations
- Appreciate methods for identifying and improving interaction in business processes

## Course Methodology of Essentials of Quality Assurance

The participant will learn by active participation during the course through the utilization of case materials and exercises which will bring a practical understanding to the concepts of quality assurance and management. This may include the chance to relate the training of the course to "real life" issues in their own organization and their experience as customers themselves.
