Venture Operations of Cash Calls for Oil and Gas

Course code: JV103 From: 20-12-2026 Venue: Amman (Jordan) - Course Fees: 3100 £

Introduction

Many international and national oil and gas companies collaborate in joint venture (JV) projects in order to develop and produce oil and/or gas in an economically viable manner. It also assists oil and gas companies in mitigating risk at various stages of a field's lifecycle.

Every year, billions of dollars are invested in upstream projects. This massive investment will be driven primarily by the terms and conditions of Joint Operating Agreements (JOA), which require all participants to contribute funds to shared activities. A Joint Venture agreement fundamentally requires all participants to pay their share of expenses (operating or capital) upon a cash call by the operator; however, if any of the investors fails to pay its share. Under the terms and conditions of the Joint Operating Agreements, such a failure would normally be considered a "Default" (JOA).

This course explains the fundamentals of cash calling in joint venture contracts with practical accounting procedures and reporting; types of cash; fundamentals and workflows for cash calling in joint venture contracts; outstanding cash calls and repayment options; and the impact of cash default on joint venture operations and profitability. The course also emphasizes critical issues related to implementing budgeting and auditing processes for oil and gas joint ventures. To demonstrate the field application of the concepts covered in the course, both the structural aspects of cash calling and real-world case studies will be discussed.

Course Objectives of Venture Operations of Cash Calls for Oil and Gas

This is a unique training course with professional techniques that enables delegates from all financial and commercial disciplines to effectively understand the Cash Calling activities through the oil and gas joint venture. Outstanding cash calls and repayment options, the impact of cash default on the project viability, and disputes are included.

This course will also cover contract types, and it also outlines critical issues involved in making an oil and gas joint venture successful and the accounting, budgeting, and auditing practices involved.

By the end of this course:
